

MECHANICAL SELF RE-TRACKING SWING GATES SW 021.010/SW 021.020

Swing gates with lockers SW 021.010/SW 021.020

The gate opens in one direction when the wing is pushed and then re-tracks back automatically and closes the entrance. The gate is equipped with a locker that blocks the wing in an open position. The gate should be mounted and the re-tracking speed regulated accordance to the user instructions. The equipment is intended to be used in closed places with firm floors. The system is mounted with three Ø8x120 screws and Ø12x100 pegs. Gates are made of steel and coated with nickel chromium.

Weight – approximately 12.5 kg
