

STORE TABLES FOR SHOPPING BASKETS

Store tables

Store table for shopping baskets is made of steel and coated with nickel chromium. Such tables are used in small, medium and large sized self service stores. There are four sizes.

The smallest (SW 040.100) is designed to hold three piles of baskets side by side over the length of the table. The largest (SW 040.190) holds six piles of baskets. The tables can hold 100 kg of baskets equally spread over the surfaces.
