

**bramka wejściowa  
SW 020.010 / SW 020.020**

Bramka wejściowa stanowi ważny element w systemach wejściowych. Otwarcie bramki jest jednokierunkowe, poprzez pchnięcie skrzydła — zamknięcie samooczynne. Montaż i regulację siły powrotu skrzydła wykonać wg. instrukcji. Urządzenie przeznaczone do użytkowania w pomieszczeniach zamkniętych o utwardzonym podłożu. Mocowanie za pomocą 3 śrub  $\varnothing 8 \times 120$  i kołków rozporowych  $\varnothing 12 \times 100$ . Bramka wykonana jest ze stali pokrytej warstwą niklowo-chromową.

Ciężar bramki ~ 11,5 kg.
